“Herold: Internal Medicine” is a lecture oriented representation taking account of the topic catalogue for the medical examination for physicians. It contains ICD-10 codes within the text and the index.

“Herold: Innere Medizin” by Gerd Herold (MD) is one of the leading textbooks of internal medicine in Germany, if not the leading one. Its enormous popularity is based on the facts that it represents the topics of internal medicine in an accurate and systematic form and that it has been updated every year since 1982.

Because of its success, it has been translated into several languages.

For several years, there has been a growing need for an English edition. This has finally been made possible, thanks to committed German and English physicians and certified translators.

HEROLD – it’s ingenious!
